CARE INSTRUCTIONS

Keep the fabric looking as vibrant and spotless as the day you bought it by following the care instructions below.

Remove the stains with a spoon and dry tissue paper.

Apply cleaning agent and wait 2–3 minutes.

Rub the stain using a damp microfiber cloth.

Rinse the microfiber cloth regularly and rub until the cleaning agent is removed.

Once the stain has been removed, use a vacuum cleaner to extract the water.

Let it air dry naturally, preferably laid flat.
